

RAUT

4 front jet nozzles with **high unblocking capacity** in case of grease, soap, limestone along the pipes.

They can also be used in this case where reverse cleaning is required (i.e. from the house to the sewer).

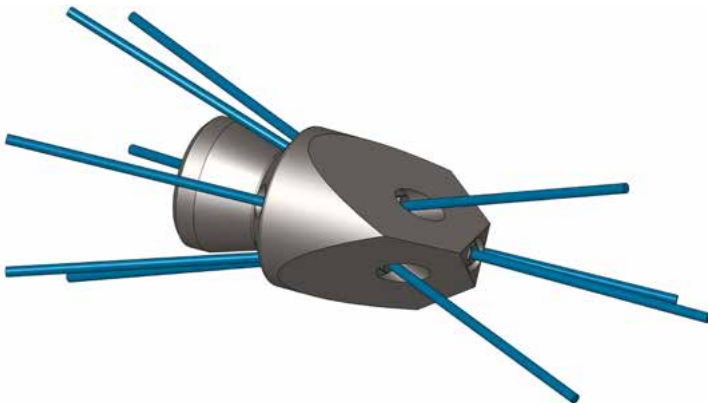

With **ceramic inserts** as standard configuration, with steel inserts upon request.

Smaller sizes ($\frac{1}{4}$ " to $\frac{1}{2}$ ") are only set with steel inserts or drilled jets.
